

Akash Jaiswal

Java Backend Developer | Spring Boot | REST APIs | Oracle SQL/PL-SQL

Mumbai, India | +91 9653391883 | akashjaiswal8291@gmail.com | linkedin.com/in/akash-jaiswal-a9721a24a

Professional Summary

Java Backend Developer with 3.5+ years of experience building and supporting backend applications processing tens of thousands of records/transactions for insurance and banking clients at Tata Consultancy Services (TCS), as part of a 9+ member Agile delivery team. Skilled in Java, Spring Boot, REST APIs, Hibernate/JPA, and Oracle SQL/PL-SQL, with a track record of diagnosing and resolving real production issues – from a duplicate-submission bug affecting live users to slow PL/SQL queries and file-transfer failures. Experienced in backend development, database integration, and production-oriented issue resolution across Development, SIT, UAT, and PT environments.

Technical Skills

- **Programming:** Java, Java 8 / Java 17, OOP, Collections, Multithreading, Exception Handling, Stream API, Lambda Expressions
- **Backend:** Spring Framework, Spring Boot, Spring MVC, Spring Data JPA, Hibernate, REST APIs, Microservices
- **Database:** Oracle Database, SQL, PL/SQL, Stored Procedures, Joins, Transactions
- **Tools & Technologies:** Maven, Git, Postman, Apache POI, Lombok, Log4j, SFTP, iText, Tomcat, Oracle WebLogic, Eclipse, VS Code

Professional Experience

System Engineer / Java Backend Developer

Nov 2022 – Present

Tata Consultancy Services (TCS), Mumbai, India

Fund Request Application — Insurance Domain

Java 8, Spring Boot, Hibernate, Oracle Database, WebLogic, Angular, SFTP, REST APIs

- Developed and maintained REST APIs and backend services for a Fund Request Application enabling users to raise and track fund requests, using Java, Spring Boot, and Hibernate.
- Diagnosed and fixed a duplicate fund-request submission bug in production – caused by client-side retry logic re-triggering requests and affecting live users – by adding a duplicate-check/idempotency safeguard before database insert.
- Resolved recurring SFTP file-transfer failures on a system exchanging tens of thousands of records, caused by missing retry/error-handling logic and timeouts on larger file transfers, improving reliability of automated back-office data exchange.
- Generated PDF reports for fund-request information using iText and supported deployment/configuration on Oracle WebLogic, coordinating with the Angular frontend team for end-to-end functionality.

IFRS 17 — Insurance / Financial Reporting

Java 8, Tomcat, Oracle PL/SQL, Oracle Database

- Developed Java and Oracle PL/SQL components supporting IFRS 17 calculation modules, including General Measurement Model (GMM), Premium Allocation Approach (PAA), Variable Fee Approach (VFA), and Reinsurance.
- Worked on the Contractual Service Margin (CSM) calculator, supporting financial calculation logic for insurance contracts.
- Diagnosed a slow-running PL/SQL query causing delays in IFRS 17 report generation over tens of thousands of records, and optimized it by adding appropriate indexing and restructuring the query to avoid a full table scan.

CEDGE Payroll — Banking / Payroll

Java, PL/SQL, Oracle Forms, Oracle Reports, Oracle Database

- Supported backend and database development for CEDGE, a banking payroll application, using Java, Oracle PL/SQL, Oracle Forms Builder, and Oracle Reports Builder.
- Identified and fixed a payroll calculation/data discrepancy and a related Oracle Forms/Reports output issue, restoring accurate payroll reporting for end users.

NIA Project — Third-Party Integration

- Contributed to backend development and support on the NIA project, working with an Ivy portal on third-party integration after transitioning from a payroll-focused project team.

Development Process & Support

- Worked across Development, SIT, UAT, and PT environments as part of a 9+ member Agile team, owning testing, debugging, and production-oriented issue resolution for enterprise applications.
- Collaborated with cross-functional team members and business stakeholders, independently investigating and resolving technical issues to support application stability.

Education

Bachelor of Science in Information Technology

Jul 2019 – Jul 2022

Usha Pravin Gandhi College of Management, Mumbai | CGPA: 9.0

Certifications

- Java Programming Certification — Udemy
- Oracle PL/SQL Certification — Udemy
