

AKASH JAISWAL

Java Backend Developer | Spring Boot | Microservices | Oracle SQL/PL-SQL
Mumbai, India | +91 9653391883 | akashjaiswal8291@gmail.com | linkedin.com/in/akash-jaiswal-a9721a24a

PROFESSIONAL SUMMARY

Java backend developer with 3+ years building and maintaining Spring Boot microservices for banking and insurance platforms at TCS. Rebuilt REST API response paths and Hibernate query patterns that cut payroll-processing latency by ~30%, and automated PL/SQL reporting jobs that removed roughly 15 hours/week of manual work. Comfortable owning a service end-to-end — design, implementation, production support — in Agile teams.

CORE COMPETENCIES

- **Languages:** Java 8, SQL, PL/SQL
- **Frameworks:** Spring Boot, Spring MVC, Spring Data JPA, Hibernate
- **Core Java:** OOP, Collections, JDBC, Multithreading, Exception Handling
- **Security:** Spring Security, JWT, LDAP Authentication, Oracle WebGate
- **Tools & Servers:** Git, Maven, Jenkins (CI/CD), Postman, Oracle WebLogic, Apache Tomcat
- **Databases:** Oracle Database, SQL Server, PL/SQL performance tuning

WORK EXPERIENCE

Java Backend Developer | Tata Consultancy Services (TCS), Mumbai, India

Nov 2022 – Present

- Designed and maintained Spring Boot microservices supporting payroll and financial-reporting systems for a banking/insurance client, operating across SIT, UAT, PT, and Production with 99% uptime.
- Rebuilt a core Hibernate query path and REST endpoint structure that reduced average response time by ~30% for payroll batch processing (baseline: multi-second calls under peak load).
- Automated payroll and financial-reporting workflows using Java and Oracle PL/SQL, eliminating roughly 15 hours/week of manual reconciliation across the finance team.
- Built backend logic for an IFRS-17 regulatory compliance module, working directly with business analysts to translate financial-reporting rules into service logic.
- Implemented secure SFTP file-transfer integrations and dynamic PDF report generation (iText) used in daily client-facing reporting.
- Led an Oracle database version upgrade for a production system, coordinating downtime windows and validating compatibility across dependent services.
- Worked in two-week Agile sprints with a distributed team — sprint planning, code reviews, unit testing, and defect triage — and provided production on-call support with root-cause analysis for P1/P2 incidents.

Tech stack: Java 8, Spring Boot, Hibernate, REST APIs, Oracle SQL/PL-SQL, Jenkins, Git, JWT, LDAP

EDUCATION

Bachelor of Science in Information Technology

Usha Pravin Gandhi College of Management, Mumbai | CGPA: 9.0 | Jul 2019 – Jul 2022

CERTIFICATIONS

- Java Programming Certification — Udemy
- Oracle PL/SQL Certification — Udemy
